Independent Auditors' Report

To Hunya Foods Co. Ltd.:

Opinions

We have audited the Parent Company Only Balance Sheet of Hunya Foods Co. Ltd. as of December 31, 2023 and 2022, Parent Company Only Statements of Comprehensive Income, Parent Company Only Statements of Changes in Equity, Parent Company Only Statements of Cash Flows, and Notes to Parent Company Only Financial Statements (including Summary of Significant Accounting Policies) for the annual periods from January 1 to December 31, 2023 and 2022.

In our opinion, the aforementioned Parent Company Only Financial Statements present fairly, in all material respects, the financial position of Hunya Foods Co. Ltd. as of December 31, 2023, and 2022, and its financial performance and cash flows for the annual periods ended December 31, 2023, and 2022, in conformity with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers."

Basis for Opinions

We conducted our audit in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants" and auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the "Auditors' Responsibilities for the Audit of the Parent Company Only Financial Statements" section of our report. We are independent of Hunya Foods Co. Ltd. in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit key matters refer to those most material key matters for the audit on the Parent Company Only Financial Statements of the year 2023 of Hunya Foods Co. Ltd., based on the professional judgment of the accountant. These matters were addressed in the context of our audit of the Parent Company Only Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Inventory valuation

As of December 31, 2023, Hunya Foods Co. Ltd.'s inventory amounts to NT\$262,775 thousand and accounts for 7% of total parent company only assets and was material to the financial statements. Since the prices of inventory products are subject to competition from industry peers and may decrease, and since inventories are evaluated based on the number of days to expiration, the calculation of the net realizable value of inventories is complicated. Therefore, inventory evaluation is one of the important evaluation items in the accountant's auditing on the financial review of Hunya Foods Co. Ltd. Our audit procedures include, but are not limited to, those relating to the following: Understanding the internal control system established by management for inventory valuation management, evaluating the net realizable value estimated by management for inventory valuation, including sampling the relevant import and export certificates used by management to evaluate the net realizable value of inventory to verify the net realizable value used by management; sampling the inventory inbound and outbound records to verify the correctness of inventory aging and the reasonableness of the allowance for doubtful losses based on inventory aging; and conducting analytical procedures for inventory balances and inventory turnover rates. We also consider the appropriateness of the disclosure of inventories in the parent company only financial statements, as described in Note 4.9, Note 5 and Note 6 to the parent company only financial statements.

Loss allowance for accounts receivable

As of December 31, 2023, the carrying amounts of accounts receivable and allowance for losses of Hunya Foods Co. Ltd. were NT\$331,560 thousand and NT\$997 thousand, respectively, and the net accounts receivable accounted for 9% of total individual assets and were material to the financial statements. Since the allowance for losses on accounts receivable is measured based on the expected credit losses over the period of time, the measurement process requires appropriate grouping of accounts receivable and judgmental analysis of the use of assumptions related to the measurement process, including the appropriate aging range, the loss rate for each aging range and the consideration of forwardlooking information. Therefore, this is one of the important evaluation items in the accountant's auditing on the financial review of Hunya Foods Co. Ltd. Our audit procedures include, but are not limited to, those relating to the following: Verifying if customer groups with significantly different loss types are appropriately grouped; testing the reserve matrix, including assessing the reasonableness of the determination of the age range of each group and checking the correctness of the original evidence against the underlying information; testing statistical information related to loss ratio calculated by rolling rate; considering the reasonableness of the forward-looking information included in the loss ratio assessment; and assessing whether such forward-looking information affects the loss ratio. In addition, we perform analytical review procedures to evaluate whether there is any significant abnormality in the two-period comparison of the changes in accounts receivable. The collectability of accounts receivable is evaluated by reviewing the collection status of accounts receivable after the due date for customers with large receivable balances at the end of the period. We also considered the appropriateness of the disclosure of accounts receivable in the parent company only financial statements as described in Note 5, Note 6 and Note 12.4 to the parent company only financial statements.

Responsibilities of Management and Those Charged with Governance for the Parent Company Only Financial Statements

To ensure that the Parent Company Only Financial Statements do not contain material misstatements caused by fraud or errors, the management is responsible for preparing prudent Parent Company Only Financial Statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and for preparing and maintaining necessary internal control procedures pertaining to the Parent Company Only Financial Statements.

In preparing the Parent Company Only Financial Statements, the management is responsible for assessing Hunya Foods Co. Ltd.'s ability to continue as a going concern, disclosing, as applicable, matters related to the going concern and using the going concern basis of accounting unless the management either intends to liquidate Aurora Corporation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing Hunya Foods Co. Ltd.'s financial reporting process.

Auditors' Responsibilities for the Audit of the Parent Company Only Financial Statements

Our objectives are to obtain reasonable assurance about whether the Parent Company Only Financial Statements as a whole are free from material misstatements, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the auditing standards generally accepted in the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

- 1. Identify and evaluate the risk of material misstatements due to fraud or error in the Parent Company Only Financial Statements; design and carry out appropriate countermeasures for the evaluated risk; and obtain sufficient and appropriate evidence as the basis for audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal controls of Hunya Foods Co. Ltd.
- 3. Assess the appropriateness of the accounting policies adopted by the management, as well as the reasonableness of their accounting estimates and relevant disclosures.
- 4. Conclude on the appropriateness of the management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Hunya Foods Co. Ltd.'s ability to operate as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the Parent Company Only Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause Hunya Foods Co. Ltd. to cease to continue as a going concern.
- 5. Evaluate the overall expression, structure and contents of the Parent Company Only Financial Statements (including relevant Notes), and whether the Parent Company Only Financial Statements fairly present relevant transactions and items.
- 6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Hunya Foods Co. Ltd. to express an opinion on the Parent Company Only Financial Statements. We are responsible for the direction, supervision, and performance of the audit and for expressing an opinion on the Group's audits.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine the key audit matters of Hunya Foods Co. Ltd.'s Parent Company Only Financial Statements for the year ended December 31, 2023. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Hunya Foods Co. Ltd.

Notes to the Parent Company Only Financial Statements

For the Years Ended December 31, 2023 and 2022

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

I. <u>Company History</u>

Hunya Foods Co., Ltd. (hereinafter referred to as the "Company") was incorporated on June 14, 1976. As of December 31, 2023, the paid-in capital of the Company was NT\$866,740,000 after multiple capital increases. The main business activities of the Company are the manufacturing, processing and trading of confectionery, biscuits, chocolates, mooncakes, pastry, bread, and cake. The Company's shares have been traded on the Taiwan Stock Exchange since September 2001, and its registered office and principal place of business is located at 5F., No. 3, Aly. 8, Ln. 45, Baoxing Rd., Xindian Dist., New Taipei City, Taiwan (R.O.C.).

II. <u>Date of Authorization for Issuance of the Parent Company Only Financial Statementsand</u> <u>Procedures for Authorization</u>

The parent company only financial statements of the Company (hereinafter referred to as the "Company") for the years ended December 31, 2023 and 2022 were published upon approval of the Board of Directors on February 27, 2024.

III. <u>Application of New and Amended Standards and Interpretations</u>

1. Changes in accounting policies resulting from applying certain standards and amendments for the first time

The Company applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised or amended which are endorsed by the Financial Supervisory Commission ("FSC") and become effective for annual periods beginning on or after January 1, 2023. The adoption of the new standards and amendments had no material impact on the Company.

2. As of the date of adoption of the financial statements, standards or interpretations issued, revised or amended, by the International Accounting Standards Board ("IASB") which are endorsed by the FSC, but not yet adopted by the Company as at the end of the reporting period are listed below:

Item	New/Revised/Amended Standards and Interpretations	Effective Date Issued by IASB
1	Classify Liabilities as Current or Non-current (Amendments to IAS1)	January 1, 2024
2	Lease Liability in a Sale and Leaseback (Amendments to IFRS 16)	January 1, 2024
3	Non-current Liabilities with Covenants (Amendments to IAS1)	January 1, 2024
4	Supplier Finance Arrangements (Amendments to IAS 7 and IFRS 7)	January 1, 2024

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

(1) Classify Liabilities as Current or Non-current (Amendments to IAS1)

These are the amendments to paragraphs 69-76 of IAS 1 Presentation of Financial Statements and the amended paragraphs related to the classification of liabilities as current or non-current.

(2) Lease Liability in a Sale and Leaseback (Amendments to IFRS 16)

The amendments add seller-lessees additional requirements for the sale and leaseback transactions in IFRS 16, thereby supporting the consistent application of the standard.

(3) Non-current Liabilities with Covenants (Amendments to IAS1)

The amendments improved the information companies provide about long-term debt with covenants. The amendments specify that covenants to be complied within twelve months after the reporting period do not affect the classification of debts as current or non-current at the end of the reporting period.

(4) Supplier Finance Arrangements (Amendments to IAS 7 and IFRS 7)

This amendment includes not only a description but also the new disclosures of Supplier Finance Arrangements.

The aforesaid amendments are newly issued, revised and amended standards or interpretations that have been issued by the IASB and endorsed by the FSC and are applicable for accounting periods beginning after January 1, 2024. The Company assesses that the newly issued or amended standards, or interpretations have no material impact on the Company.

3. As of the date of adoption of the financial statements, standards or interpretations issued, revised or amended, by International Accounting Standards Board ("IASB") which are endorsed by FSC, but not yet adopted by the Company as at the end of the reporting period are listed below:

Item	New/Revised/Amended Standards and Interpretations	Effective Date Issued by IASB
1	Amendments to IFRS10 "Consolidated Financial	To be determined by
	Statements" and IAS 28 "Investments in Associates and	IASB
	Joint Ventures" - "Sale or Contribution of Assets between	
	an Investor and its Associate or Joint Venture"	
2	IFRS17 "Insurance Contracts"	January 1, 2023
3	Lack of Exchangeability (Amendments to IAS 21)	January 1, 2025

(1) Amendments to IFRS10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" - "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"

The amendments address the inconsistency between the requirements in IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures", in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint venture. IFRS 10 requires full profit or loss recognition on the loss of control of the subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

(2) IFRS17 "Insurance Contracts"

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model. |Under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfillment cash flows and the contractual service margin. The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims.

Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for shortduration contracts.

IFRS 17 was issued in May 2017 and it was amended in 2020 and 2021. The amendments include deferral of the date of initial application of IFRS 17 by two years to annual beginning on or after January 1, 2023 (from the original effective date of January 1, 2021); provide additional transition reliefs; simplify some requirements to reduce the costs of applying IFRS 17 and revise some requirements

to make the results easier to explain. IFRS 17 replaces an interim Standard – IFRS 4 Insurance Contracts – from annual reporting periods beginning on or after January 1, 2023.

(3) Lack of Exchangeability (Amendments to IAS 21)

This amendment describes the exchangeability and lack of exchangeability between currencies, as well as how to determine the exchange rate in case of lack of exchangeability of currency. It also stipulates the additional disclosures upon a lack of exchangeability. This amendment applies to accounting years after January 1, 2025.

The abovementioned standards and interpretations issued by IASB have not yet been endorsed by FSC at the date when the Company's financial statements were authorized for issue, the local effective dates are to be determined by FSC. The Company assesses all standards and interpretations have no material impact on the Company.

IV. <u>Summary of Significant Accounting Policies</u>

1. Statement of Compliance

The parent company only financial statements of the Company for the years ended December 31, 2023 and 2022 were prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

2. Basis of Preparation

The Parent Company Only Financial Statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers. Pursuant to Article 21 of the Regulations Governing the Preparation of Financial Reports by Securities Issuers, the current gain or loss and other comprehensive income in the Parent Company Only Financial Statements is equal to the current gain or loss and other comprehensive income as attributable to owners of parent company in the Consolidated Financial Statements. Furthermore, the owner's equity in the Parent Company Only Financial Statements is equal to the equity attributable to owners of the parent company in the Consolidated Financial Statements. Therefore, investments in subsidiaries are expressed using "investments accounted for using equity method" in the Parent Company Only Financial Statements, and necessary valuation adjustments will be made.

The parent company only financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value. The parent company only financial statements are expressed in thousands of New Taiwan

Dollars ("NT\$") unless otherwise stated.

3. Foreign currency transactions

The Company's parent company only financial statements are presented in NT\$, which is also the Company's functional currency.

Transactions in foreign the currencies are recorded by their respective functional currency rates at the date of the transaction. At the end of every reporting period, items denoted in foreign currencies will be translated at the closing exchange rate of the day. Non-monetary foreign currency items measured at fair value will be translated using the exchange rate on the date when the fair value is measured. Non-monetary foreign currency items measured at the exchange rate of the date of the translated at the exchange rate of the date of the translated at historical cost are translated at the exchange rate of the date of the transaction.

All exchange differences arising on the settlement of monetary items or on translating monetary items are taken to profit or loss in the period in which they arise except for the following:

- (1). Exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- (2). Foreign currency items within the scope of IFRS 9 Financial Instruments are accounted for based on the accounting policy for financial instruments.
- (3). Exchange differences arising on a monetary item that forms part of a reporting entity's net investment in a foreign operation are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

4. Translation of financial statements in foreign currency

The assets and liabilities of foreign operations are translated into New Taiwan Dollars at the closing rate of exchange prevailing at the reporting date and their income and

expenses are translated at an average rate for the period. The exchange differences arising from the translation are recognized in other comprehensive income. On the disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized. On the partial disposal of foreign operations that result in a loss of control, loss of significant influence or joint control but retaining partial equity is considered a disposal.

On the partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to the non-controlling interests in that foreign operation. In partial disposal of an associate or joint arrangement that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

5. Classification of Current and Non-current Assets and Liabilities

An asset is classified as current when one of the following criteria is met; all other assets are classified as non-current assets:

- (1). It is expected to be realized, or intended to be sold or consumed in the normal operating cycle.
- (2). It is held primarily for the purpose of trading.
- (3). It is expected to be realized within twelve months after the reporting period.
- (4). The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current when one of the following criteria is met; all other liabilities are classified as non-current liabilities:

- (1). It is expected to be settled in the normal operating cycle.
- (2). It is held primarily for the purpose of trading.
- (3). It is due to be settled within twelve months after the reporting period.
- (4). Liabilities whose settlement can be deterred unconditionally for at least twelve months after the reporting period. The liabilities provisions may be settled by

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

issuing equity instruments at the option of the counterparty, and will not impact its classification.

6. Cash and Cash Equivalents

Cash and cash equivalents are cash on hand, demand deposit, and short-term and highly liquid investments that can be immediately converted to fixed amount of cash with very small risks of valuation changes (including contract-based fixed deposits of less than 12 months).

7. Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities within the scope of IFRS 9 Financial Instruments: Recognition and Measurement are recognized initially at fair value and the transaction costs directly attributable to the financial assets and financial liabilities (except for financial assets and financial liabilities at fair value through profit or loss) are derived by addition or subtraction from the fair value of assets and financial liabilities.

(1) Recognition and valuation of financial assets

The accounting treatment for recognition and derecognition of all customary trading of financial assets of the Company is made on the settlement date.

The Company classifies financial assets as either financial assets subsequently measured at amortized costs, measured at fair value through other comprehensive income (loss), or measured at fair value through profit or loss:

- A. Business model used in managing the financial assets
- B. Characteristics of the contractual cash flows from the financial asset

Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables, financial assets measured at amortized cost and other receivables etc., on balance sheet as at the reporting date:

- A. Business model used in managing the financial assets: Financial asset is held to receive contractual cash flows
- B. Characteristics of the contractual cash flows from the financial asset: Cash flow is the interest paid solely on the principal and the outstanding principal

Such financial assets (excluding hedging relationships) will be measured at subsequent amortized cost **[** amount measured at the time of initial recognition, less the principal repaid, and add or subtract the accumulated amortized

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

difference (using effective interest method) between the original amount and the amount due, and by adjusting allowances for loss **]**. When derecognizing, through amortization procedure, or recognizing impairment gain or loss, the gain or loss will be recognized as profit or loss.

Interest calculated through effective interest method (multiplying effective interest with the total book value of the financial asset) or the following conditions will be recognized in profit or loss:

- A. If it is a purchased or originated credit-impaired financial asset, the creditadjusted effective interest rate is multiplied by the cost of amortized financial assets
- B. If it is not, in case of subsequent credit impairment, the effective interest rate will be multiplied by the cost of the financial instrument after amortization

Financial assets at fair value through other comprehensive income

Financial assets that meet both of the following criteria will be measured at fair value through other comprehensive income, and stated on the Balance Sheet as financial assets measured at fair value through other comprehensive income:

- A. Business model used in managing the financial assets: Financial asset is held to receive contractual cash flows and for sale of financial asset
- B. Characteristics of the contractual cash flows from the financial asset: Cash flow is the interest paid solely on the principal and the outstanding principal

Recognition of gain or loss related to such financial assets will be explained as follows:

- A. Prior to derecognition or reclassification, except for impairment interest or loss, exchange gain or loss will be recognized in the profit or loss, and its gain or loss will be recognized in other comprehensive income
- B. During derecognition, accumulated gain or loss recognized in other comprehensive income will be reclassified from equity to profit or loss as adjustments for reclassification
- C. Interest calculated through effective interest method (multiplying effective interest with the total book value of the financial asset) or the following conditions will be recognized in profit or loss:
 - (a) If it is a purchased or originated credit-impaired financial asset, the credit-adjusted effective interest rate is multiplied by the cost of amortized financial assets
 - (b) If it is not, in case of subsequent credit impairment, the effective interest rate will be multiplied by the cost of the financial instrument after amortization

In addition, for equity instruments applicable to IFRS 9 and are not held as available-for-sale or applicable as a contingent consideration by the acquirer in business consolidation in IFRS 3, during initial recognition, the Company will choose (this is not reversible) to state its subsequent fair value changes in the

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

other comprehensive income (loss). Amounts stated in other comprehensive income cannot be converted to income or loss (during disposal of such equity instrument, the accumulated amount stated in other equity item will be directly transferred to retained earnings), and will be stated in the Balance Sheet as financial assets measured at fair value through other comprehensive income (loss). Investment dividends will be recognized in profit or loss, unless such dividends clearly represent a portion of the investment cost.

(2) Impairments of Financial Assets

For the debt instrument investment measured at fair value through other comprehensive income (loss) and the financial assets measured at amortized cost, the Company recognizes expected credit losses and measures allowances for loss. For the debt instrument investment measured at fair value through other comprehensive income, allowance for loss is recognized in the other comprehensive income (loss), and the book value of the investment will not be reduced.

The Company measures expected credit loss by reflecting the following methods:

- A. Unbiased and probability-weighted amount determined by evaluating each possible outcome
- B. The time value of money
- C. Reasonable and corroborative information related to past events, current conditions, and future economic forecasts (can be obtained at no excessive cost or input on the Balance Sheet date)

Method for valuating allowance for loss is as follows:

- A. Measure the expected credit loss over the next 12 months: Including financial assets without significant increase in credit risk after initial recognition, or those ruled to have low credit risk on the Balance Sheet date. In addition, this also includes those with allowance loss measured by the expected credit loss during the previous reporting period, but no longer meets the condition in which the credit risk has significant increased since the original recognition on the Balance Sheet date.
- B. Measurement of the amount of lifetime expected credit losses: Including financial assets with significant increase in credit risk after initial recognition or purchased or originated credit-impaired financial asset with credit impairment.
- C. For accounts receivable or contractual assets arising from transactions within the scope of IFRS 15, the Company adopts lifetime expected credit loss to measure allowance for loss.
- D. For rental receivables arising from transactions within the scope of IFRS 16, the Company adopts lifetime expected credit loss to measure allowance for loss.

On each Balance Sheet date, the Company uses comparisons between the changes of default risk on the Balance Sheet date and on the date of initial recognition to

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

measure whether there has been a significant increase in the financial instrument's credit risk after initial recognition.

(3) Derecognition of financial assets

The Company's financial assets will be derecognized when one of the following conditions occurs:

- A. The contractual right from the cash flow of the financial asset is terminated
- B. When nearly all risk and compensations associated with ownership of a financial asset has been transferred.
- C. Nearly all risk and compensations associated with ownership of an asset has neither been transferred nor retained, but the control of the asset has been transferred.

When a financial asset is derecognized in its entirety, the difference between its carrying amount and any cumulative gain or loss that has been received or is receivable and recognized in other comprehensive income, will be recognized in profit or loss.

(4) Financial liabilities and equity instruments

<u>Classification of liability or equity</u>

The Company classifies the liabilities and equities instrument issued as financial liability or equity in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

Equity instruments

Equity instruments refer to any contract with residual interest after subtracting all liabilities from assets. Equity instruments issued by the Company are recognized by the acquisition cost minus direct distribution costs.

Financial liabilities

Financial liabilities within the scope of IFRS 9: upon initial recognition, recognition and measurement are either classified as financial liabilities measured at amortized cost.

Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include accounts payables and loans, and will continue to be measured through effective interest method after initial recognition. When financial liabilities are derecognized and amortized using effective interest method, related gain or loss and amortization will be recognized in profit or loss.

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

Calculation of the amortized cost will take discount or premium during acquisition and transaction cost into consideration.

Derecognition of financial liabilities

When the obligation of a financial liability is terminated, canceled or no longer effective, the financial liability will be derecognized.

When the Company and the creditors exchange debt instruments with significant differences, or make major changes to all or part of the existing financial liabilities (whether due to financial difficulties or otherwise), treatment will include derecognition of the original liabilities and the recognition of new liabilities. During derecognition of financial liabilities, the difference between the carrying amount and the total amount of the consideration paid or payable, including the transferred non-cash assets or liabilities assumed, is recognized in profit or loss.

(5) Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities can only be offset and presented in net terms on the balance sheet only when the recognized amounts currently contain exercise of legal rights for offset and are intended to be settled on a net basis or can be realized simultaneously and the debt can be settled.

8. Fair value measurement

Fair value refers to the price required or transferred to an asset in an orderly transaction between market participants on a measurement date. Fair value measurement assumes that the transaction for the asset being sold or liability being transferred takes place in one of the following markets:

- (1) Principal market of the asset or liability, or
- (2) If no principal market exists, the most favorable market for the asset or liability

The Company needs to be able to enter the principal or most favorable market in order to carry out the transaction.

Fair value measurement of the asset or liability uses the assumption that market participants would adopt while pricing the asset or liability, where the assumption is that the market participants would take the most favorable economic conditions into consideration.

The fair value measurement of a non-financial asset takes into consideration the market participant's use of the asset for its highest price and best use or by selling the asset to another market participant who will use the asset for its highest price and best use to generate economic benefits.

The Company uses valuation techniques that are appropriate and relevant in the relevant circumstances to measure fair value and maximize the use of observable inputs and to minimize the use of unobservable inputs.

9. Inventory

Inventories are evaluated on a case-by-case basis by the cost and net realizable value.

Cost refers to the cost of bringing inventory to a state of sale or availability for production and location:

Raw materials	—	The First In First Out (FIFO) approach is used for the
		actual purchase cost.
Finished goods and	_	Including direct raw materials, labor and fixed
work in progress		manufacturing costs apportioned at normal production
		capacity, but excluding borrowing costs.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Rendering of services is accounted in accordance with IFRS 15 and not within the scope of inventories.

10. Investments Accounted for Using the Equity Method

Investments to subsidiaries are made pursuant to Article 21 of the "Regulations Governing the Preparation of Financial Reports by Securities Issuers." These investments are expressed by "investments accounted for using equity method" and necessary rating adjustment is conducted so that current profit and loss and other comprehensive income in the Parent Company Only Financial Statements and the current profit and loss and other comprehensive income (loss) attributable to owners of the parent company in the Consolidated Financial Statements are equivalent, and the owner's equity in the Parent Company Only Financial Statements is equivalent to the equity attributable to owners of parent company in the Consolidated Financial Statements. Such adjustments are made in consideration of the differences between the investment in subsidiaries in the Consolidated Financial Statements in accordance with IFRS 10 "Consolidated Financial Statements," and the applicable IFRS reporting at different levels, and either debits or credits the "investment accounted for using equity method," "profit or loss from subsidiaries, associates, and joint venture accounted for using equity method," or "other comprehensive income (loss) from subsidiaries, associates, and joint venture accounted for using equity method."

The Company's investment in associates adopts equity method except for those classified as available for sale. Associates refer to the companies in which the Company has material influence over.

Under the equity method, the investment associates are accounted for on the balance sheet as the amount recognized by the Company for the change in the net assets of the associate based on the shareholding ratio. After the carrying amount and other related long term equity in investments in associates under the equity method are reduced to zero, extraneous losses and liabilities will be recognized in the context of legal obligations, constructive obligations, or payments made on behalf of the associates. Unrealized gain or loss occurring between the Company and associates will be eliminated in proportion to the shares held in the associates. When the change in the equity of the associate is not due to profit or loss and other comprehensive profit or loss items, and does not affect the Company's shareholding ratio, the Company will recognize the change in the relevant ownership interest based on the shareholding ratio. Therefore, recognized capital surplus will be reverted to profit or loss in proportion to the disposal subsequent to disposal of the associates.

When an associate issues new shares, if the Company does not subscribe in proportion to its shareholding, the Company's shareholdings in the associates net assets will increase or decrease accordingly. The change will be adjusted by "capital surplus" and "investments accounted for using equity method." When the shareholding ratio decreases, the recognized related items in other comprehensive income (loss) will be first reclassified to profit or loss or other appropriate item in proportion to the decrease in shareholding ratio. The aforementioned recognized capital surplus will be reverted to profit or loss during subsequent disposal of the associate.

The financial statements of the associates are prepared for the same reporting period as the Company, and adjusted to align their accounting policies with the Company's accounting policies.

The Company determines at each reporting date whether there is any objective evidence that the investment in the associate company is impaired in accordance with IAS 28 "Financial Instruments: Recognition and Measurement." If this is the case the Company calculates the amount of impairment as the difference between the

recoverable amount of the associate company and its carrying value and recognizes the amount in the "share of profit or loss of an associate company" in the statement of comprehensive income in accordance with IAS 36 "Impairment of Assets." In case the aforementioned recoverable amount adopts the useful value of the investment, the Company will determine the relevant useful value based on the following estimates:

- (1) The share of the present value of the estimated cash flows generated by the associates of the Company, including the cash flows generated by the associates due to the operation and the final disposal of the investment; or
- (2) The Company expects to receive dividends from the investment and ultimately dispose of the present value of the estimated future cash flows generated by the investment.

Since goodwill component item that construes the carrying amount of the investment in associates is not separately recognized; hence, the Company is not required to undertake the test for goodwill impairment as stipulated in IFRS 36 "Impairment of Assets."

When material influence over associates is lost, the Company will conduct fair value measurement and recognize the remaining investments. When material influence is lost, the difference between the carrying amount of the investment in associates and the fair value of the retained investment plus the disposal price, will be recognized as profit or loss.

11. Property, plant, and equipment

Property, plant, and equipment is recognized at the acquisition cost less accumulated depreciation and accumulated impairment. The aforementioned cost includes the dismantling of property, plant, and equipment, removing, and restoring the site on which it is located, and any necessary interest expense arising from unfinished construction. If the various component of property, plant, and equipment is material, it shall be separately recognized for depreciation. When the material components of property, plant and equipment requires to be regularly replaced, the Company will see the item as a separate asset and to separately recognize it through its useful life and depreciation method. The carrying amount of the replaced component will be derecognized in accordance with the derecognition rule in IAS 16 Property, Plant, and Equipment. When material inspection cost complies with criteria for recognition, it will be treated as a replacement cost and recognized as a part of the carrying amount of the property, plant, and equipment. All other fixture and maintenance expense will be recognized in profit or loss.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the following assets:

Housing and Construction Machinery Transportation Equipment	3-50 years 3-48 years 3-16 years
Computer ar	5
telecommunication	
equipment	
Leasehold improvements	Whichever is shorter in terms of lease term or
	durability
Other Equipment	2-24 years

After initial recognition of property, plant, and equipment, or any of its material components, if disposal occurs or if inflow of economic benefit is not expected to occur from its use or disposal thereof in the future, it shall be derecognized and recognized in profit or loss.

Residual value, useful life and depreciation methods of property, plant, and equipment will be evaluated at the end of each fiscal year. If expected value differs from previous estimates, the changes will be treated as changes in accounting estimates.

12. Investment property

The Company's owned investment properties are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met and excludes the costs of day-to-day servicing of an investment property. Subsequent to initial recognition, other than those that meet the criteria to be classified as held for sale (or are included in a disposal group that is classified as held for sale) in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, investment properties are measured using the cost model in accordance with the requirements of IAS 16 Property, plant and equipment for that model. If investment properties are held by a lessee as right-of-use assets and is not held for sale in accordance with IFRS 5, investment properties are measured in accordance with the requirements of IFRS 16.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the following assets:

Buildings 5-46 years

Investment properties are derecognized when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss in the period of derecognition.

The Company transfers properties to or from investment properties according to the actual use of the properties.

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

Properties are transferred to or from investment properties when the properties meet, or cease to meet, the definition of investment property and there is evidence of the change in use.

13.Leases

The Company evaluates whether a contract is (or includes) a lease on the contract establishment date. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company assesses whether, throughout the period of use, has both of the following:

- (1) The right to obtain substantially all of the economic benefits from use of the identified asset; and
- (2) The right to direct the use of the identified asset.

For a contract that is, or contains, a lease, the Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract. For a contract that contains a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. The relative stand-alone price of lease and non-lease components shall be determined on the basis of the price the lessor, or a similar supplier, would charge the Company for that component, or a similar component, separately. If an observable stand-alone price is not readily available, the Company estimates the stand-alone price, maximizing the use of observable information.

Company as a lessee

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company recognizes right-of-use asset and lease liability for all leases which the Company is the lessee of those lease contracts.

At the commencement date, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the implicit interest rate in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses its incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

(1) Fixed payments (including substantial fixed payments), minus any lease incentives that can be obtained;

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

- (2) Variable lease payments dependent upon certain indicators or rates (measured by the indicators or rates used on the start date);
- (3) Expected residual value guarantee from the lessee;
- (4) Exercise price for purchase of options, if the Company can be reasonably assured that the right will be exercised; and
- (5) Penalties for termination of the lease, in case the lease period reflects that the lessee will exercise the option to terminate the lease.

After the commencement date, the Company measures the lease liability on an amortized cost basis, which increases the carrying amount to reflect interest on the lease liability by using an effective interest method; and reduces the carrying amount to reflect the lease payments made.

At the commencement date, the Company measures the right-of-use asset at cost. The cost of the right-of-use asset comprises:

- (1) The original valuation of the lease liability;
- (2) Any lease payment paid on the start date or before, minus any lease incentives taken;
- (3) Any original direct cost that the lessee incurs; and
- (4) Estimated cost of the lessee's dismantling, removing the target asset and restoration at the asset's location, or the cost to restore the target asset to the state required in the terms and conditions of the lease.

For subsequent measurement of the right-of-use asset, the Company measures the rightof-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Company measures the right-of-use applying a cost model.

If the lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, the Company depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Company depreciates the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company applies IAS 36 "Impairment of Assets" to determine whether the rightof-use asset is impaired and to account for any impairment loss identified.

Except for those leases that the Company accounted for as short-term leases or leases of low-value assets, the Company presents right-of-use assets and lease liabilities in the balance sheet and separately presents lease-related interest expense and depreciation charge in the statements of comprehensive income.

For short-term leases or leases of low-value assets, the Company elects to recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis.

For the rent concession arising as a direct consequence of the COVID-19 pandemic, the Company elected not to assess whether it is a lease modification but accounted it as a variable lease payment. The Company applied the practical expedient to all rent concessions that meet the conditions for it.

Company as a lessor

At inception of a contract, the Company classifies each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

For contracts that include lease components and non-lease components, the Company will distribute the considerations in the contract using regulations from IFRS 15.

The Company recognizes lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

14.Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, not meeting the recognition criteria, are not capitalized and expenditure is reflected in profit or loss for the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each financial year.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Gains or losses arising from derecognition of intangible assets will be recognized in profit or loss.

Computer Software

Computer software costs are amortized on a straight-line basis over its estimated useful life (2-4 years).

A summary of the policies applied to the Company's intangible assets is as follows:

	Computer Software
Useful lives	Finite
Amortization method used	Amortized on a straight-line basis over
	the estimated useful
life Internally generated or acquired	Acquired

15.Impairment of non-financial assets

The Company assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 "Impairment of Assets" may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's ("CGU") fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is

limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

An impairment loss of continuing operations or a reversal of such impairment loss is recognized in profit or loss.

16. Revenue recognition

The Company's revenue arising from contracts with customers mainly includes sale of goods. The accounting policies for the Company's types of revenue are explained as follow:

Sale of goods

The Company sells products and recognizes revenue when the promised product is delivered to the customer and the customer obtains control (the customer has the ability to lead the use of the product and obtain almost all of the remaining benefits of the product) and satisfies performance obligation. The main product of the Company is leisure food, and revenue is recognized based on the contracted price. The remaining sales transactions are usually accompanied by quantitative discounts (based on the total cumulative sales in a given period). Therefore, revenue is based on the contracted price, less the estimated amount of volume discounts. The Company uses cumulative experience to estimate the variable consideration arising from volume discounts using expectations only to the extent that it is highly probable that there will be no material reversal in the cumulative amount of revenue recognized when the uncertainty associated with the variable consideration is subsequently removed. The refund liability is also recognized relative to the expected volume discount during the specific period of the agreement.

The Company does not provide any warranty agreement for the goods provided.

The credit period for the product sales transactions of the Company is 40-90 days. Accounts receivable will be recognized when most of the contracts are subject to product transfer control and have the right to receive unconditional consideration. These receivables are usually short term and do not pose as significant financing components.

The period in which the Company reclassifies the aforementioned contractual liabilities to income does not generally exceed one year and does not result in the creation of a significant financial component.

17.Borrowing cost

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset form part of the cost of that asset and, therefore, should be capitalized. Other borrowing costs are recognized as an expense. Borrowing costs are interest and other costs incurred in connection with the borrowing of funds.

18.Government grant

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. Where the grant relates to an asset, it is recognized as deferred income and released to income in equal amounts over the expected useful life of the related asset. When the grant relates to an expense item, it is recognized as income over the period necessary to match the grant on a systematic basis to the costs that it is intended to compensate.

Where the Company receives non-monetary grants, the asset and the grant are recorded gross at nominal amounts and released to the statement of comprehensive income over the expected useful life and pattern of consumption of the benefit of the underlying asset by equal annual installments. Where loans or similar assistance are provided by governments or related institutions with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as additional government grant

19. Post-retirement benefits

All regular employees of the Company and its domestic subsidiaries are entitled to pension plans that are managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name in the specific bank account and hence, not associated with the Company and its domestic subsidiaries. Therefore, fund assets are not included in the Company's parent company only financial statements. Pension benefits for employees of the overseas

subsidiaries and the branches are provided in accordance with the respective local regulations.

For the defined contribution plan, the Company and its domestic subsidiaries will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan. The Company and its domestic subsidiaries recognize expenses for the defined contribution plan in the period in which the contribution becomes due. Overseas subsidiaries and branches make contribution to the plan based on the requirements of local regulations and the contribution is expensed as incurred.

For retirement pension plans with defined benefit plan, the Company will include the amounts after the reporting period on actuarial report through projected unit credit method. Revaluation of net defined benefit liabilities (asset) includes any changes in return on plan assets and asset ceiling and will be reduced by amount of net interest included in the net defined benefit liability (asset) and actuarial profit or loss. When revaluation of net defined benefit liability (asset) occurs, it will be recognized under other comprehensive income (loss) and immediately recognized in retained earnings. Past service cost is the change from the present value of the defined benefit plan due to plan revision or reduction, and will be recognized as expense on the earlier of the two dates:

- (1) When the plan is revised or reduced; and
- (2) When the Company recognizes relevant restructuring cost or termination benefits.

Net interest of net defined benefit liability (asset) is net defined benefit liability (asset) multiplied by the discount rate, and both will be decided at the beginning of a reporting period. Subsequently, any changes that occur to the net defined benefit liability (asset) from allocations and benefit expense during the period will be considered.

20.Income Tax

Income tax expense (benefit) is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

<u>Current income tax</u>

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for undistributed earnings is recognized as income tax expense in the subsequent year when the distribution proposal is approved by the Shareholders' meeting.

<u>Deferred income tax</u>

Deferred tax is calculated based on the temporary difference between the taxable basis of assets and liabilities and the carrying amounts on the Balance Sheet at the end of the reporting period.

All taxable temporary difference shall be recognized as deferred tax liabilities except for the following:

- Initial recognition of goodwill; or the initial recognition of an asset or liability not arising from a business combination transaction and does not affect accounting profits or taxable income (loss) at the time of the transaction;
- (2) Arising from investment in subsidiaries, associates or joint ventures, whose point of reversal can be controlled and there may not be any taxable temporary difference that shall be reversed in the foreseeable future.

Deferred income tax assets that are deductible from temporary differences, unused tax losses and unused income tax deductions are recognized in the context of probable future taxable income except for the following:

 Deductible temporary difference arising from business combination with a nonassociates, and is related to initial recognition of assets or liabilities that do not affect accounting profit or loss of taxable income (loss) at the time of transaction;

(2) Deferred income tax assets and liabilities are measured at the tax rate of the expected asset realization or in the period in which the liability is settled. The tax rate is based on the tax rates and tax laws that have been enacted in the legislative or substantive legislation at the end of the reporting period. The measurement of deferred income tax assets and liabilities reflects the tax consequences arising from the manner in which the asset is expected to be recovered or the carrying amount of the liability is settled at the end of the reporting period. The deferred income tax that is related to items not recognized in profit or loss will also not be recognized in profit or loss. It will be recognized in other comprehensive income (loss) or directly recognized in equity based on its related transaction. Deferred tax assets shall be reviewed and recognized at the end of each reporting period.

For deferred tax assets and liabilities, only the offset between the current tax assets and current tax liabilities carries legally enforceable rights. Moreover, deferred income tax may be offset when it is subject to the same taxpayer and is related to the income tax levied by the same tax authority.

V. <u>Primary Sources of Uncertainties in Material Accounting Judgments, Estimates, and Assumptions</u>

The preparation of the Company's parent company only financial statements require management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumption and estimate could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(1) Fair value of financial instruments

Where the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including the income approach (for example the discounted cash flow model) or market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note 12 for more details.

(2) Post-retirement benefits

The cost of post-employment benefit and the present value of the pension obligation under defined benefit pension plans are determined using actuarial valuations. An actuarial valuation involves making various assumptions. These include the determination of the discount rate and changes of the future salary increases Please refer to Note 6 for details on the assumptions used to measure the cost of defined benefit costs and defined benefit obligations.

(3) Revenue recognition – sales returns and allowance

The Company estimates sales returns and allowance based on historical experience and other known factors at the time of sale, which reduces the operating revenue. In assessing the aforementioned sales returns and allowance, revenue is recognized to the extent it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur.

(4) Income Tax

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective counties in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective Group company's domicile.

Deferred tax assets are recognized for all carryforward of unused tax losses and unused tax credits and deductible temporary differences to the extent that it is probable that taxable profit will be available or there are sufficient taxable temporary differences against which the unused tax losses, unused tax credits or deductible temporary differences can be utilized. The amount of deferred tax assets determined to be recognized is based upon the likely timing and the level of future taxable profits and taxable temporary differences together with future tax planning strategies.

(5) Trade receivables – estimation of impairment loss

The Company estimates the impairment loss of trade receivables at an amount equal to lifetime expected credit losses. The credit loss is the present value of the difference between the contractual cash flows that are due under the contract (carrying amount) and the cash flows that expects to receive (evaluate forward looking information). However, as the impact from the discounting of short-term receivables is not material, the credit loss is measured by the undiscounted cash flows. Where the actual future cash flows are lower than expected, a material impairment loss may arise. Please refer to Note 6 for more details.

(6) Inventories

Estimates of net realizable value of inventories take into consideration that inventories may be damaged, become wholly or partially obsolete, or their selling prices may decline. The estimates are based on the most reliable evidence available at the time the estimates are made.

VI. <u>Explanations of Significant Accounting Items</u>

1. Cash and cash equivalents

	2023.12.31	2022.12.31
Petty cash	\$480	\$480
Bank deposits	41,206	49,362
Total	\$41,686	\$49,842

2. Financial assets at fair value through other comprehensive income

	2023.12.31	2022.12.31
Investments in equity instruments at fair value		
through other comprehensive income- non- current:		
Listed companies stocks	\$708,418	\$999,859
Unlisted companies stocks		14,860
Total	\$708,418	\$1,014,719

Financial assets at fair value through other comprehensive income were not pledged.

In consideration of the Company's investment strategy, the Company participated in a private placement of 465,117, 426,440 and 380,000 common shares of PharmaEssentia Corp. listed over the counter in December 2019, June 2020 and May 2022, respectively, which are not freely transferable for three years.

On June 16, 2021, the Company's Board of Directors approved the reinvestment in Acepodia, Inc., (Cayman) in the form of a cash capital increase, with participation in the cash capital increase of 403,225 preferred shares in November 2021. Acepodia, Inc., (Cayman) was listed on the Emerging Stock Market on August 8, 2023. All 403,225 preferred shares held by the Group in this company were converted to 1,612,900 ordinary shares.

3. Notes receivable

	2023.12.31	2022.12.31
Notes receivable - from operating activities	\$2,339	\$268
Notes receivable - from non-operating activities	2,593	2,575
Subtotal (Total carrying amount)	4,932	2,843
Less: Loss allowances		
Total	\$4,932	\$2,843

Notes receivable of the Company were not pledged.

The Company assesses information related to impairment and allowance for impairment using regulations from IFRS 9. Please refer to Note 6(17) for details. Please refer to Note 12 for information on credit risk.

4. Accounts receivable

	2023.12.31	2022.12.31
Accounts receivable (Total carrying amount)	\$331,560	\$414,323
Less: Loss allowances	(997)	(997)
Subtotal	330,563	413,326
Accounts receivable - related parties	3,763	127
Total	\$334,326	\$413,453

Accounts receivable of the Company were not pledged.

The credit period granted by the Company to customers normally ranges from 30 days to 90 days. The total carrying amounts were NT\$331,560,000 and NT\$414,323,000 on December 31, 2023 and December 31, 2022 respectively. Please refer to Note 6(17) for information related to allowance for impairment loss in 2023 and 2022. Please refer to Note 12 for information on credit risk.

5. Inventories

	2023.12.31	2022.12.31
Commodities	\$676	\$2,411
Raw materials	86,967	78,118
Materials	32,767	33,290
Work in process	32,157	25,929
Finished goods	110,208	84,361
Total	\$262,775	\$224,109

The Company recognized operating costs of NT\$1,239,766,000 and NT\$1,356,013,000 in 2023 and 2022, respectively, which included NT\$24,000 and NT\$17,000 of losses on decline in value of inventories.

The aforementioned inventories were not pledged.

6. Investments accounted for using the equity method"

	2023.12.31		2022.1	2.31
Name of Investee		Shareholdi		Shareholdi
	Amount	ng	Amount	ng
Investments in subsidiaries				
HUNYA INTERNATIONAL	\$-		\$1,624	100.00%
LIMITED	φ-	-	\$1,024	100.00%
Croissant Bakery Ltd.	192,851	100.00%	190,376	100.00%
Total	\$192,851	-	\$192,000	

Investments in subsidiaries are expressed using "investments accounted for using equity method" in the Parent Company Only Financial Statements, and necessary valuation adjustments will be made.

On November 23, 2021, the Board of Directors resolved to invest in Croissant Bakery Ltd. and on January 3, 2022, the Company completed the settlement of its equity interest with a 100% stake in the company at a transaction price of NT\$175,000,000.

The Company reported the end of business operations of HUNYA INTERNATIONAL LIMITED to the board of directors on August 9, 2023, obtained a certificate of liquidation on October 11, 2023, and completed liquidation and cancelation registration.

7. Property, Plant, and Equipment

						2023	3.12.31	2022	12.31
Property, plant, and equipment for self-use					\$1,7	04,604	\$1,64	5,918

Please refer to Note 8 for the pledge of investment property, plant and equipment.

The fair value of investment properties held by the Company cannot be reliably determined. After searching the website of the Secretary of the Interior and the website of the real estate transaction inquiry service, the fair value of investment properties held by the Company as of December 31, 2023 and 2022 was estimated to

be approximately NT741,484,000 to NT\$1,249,811,000 and NT\$632,125,000 to NT\$971,142,000, respectively, by referring to the actual transaction information of the neighboring areas, and the fair value of investment properties held by the Company is highly likely to fall within the aforementioned range.

- (1) The nature of the leases is mainly for warehouses and offices, and the main contents of the leases are the same as the general leases.
- (2) Rental income from building and warehouse rentals is on a monthly basis.

Lenders	2022.12.31	Repayment period and method
Secured loans from	\$190,000	From December 29, 2022 to December 28, 2025, the
Bank of Taiwan		credit line is negotiated on a lump-sum basis, with
		principal repayment on maturity and interest
		payable monthly. The credit line is NT\$400,000,000.
Secured loans from	88,889	From April 7, 2020 to March 15, 2024, the credit line
Chang Hwa		is negotiated on a lump- sum basis, with principal
Commercial Bank		repayment on maturity and interest payable
		monthly. The credit line is NT\$150,000,000.
Secured loans	150,000	From January 24, 2022 to January 23, 2025, the credit
fromTaipei Fubon		line is available for draw-down at any time and is payable
Commercial Bank		at any time, with interest payable monthly. The credit
		line is NT\$ 195,000,000.
Secured loans from	60,000	From December 14, 2022 to December 13, 2024, the
E.SUN Commercial		credit line is negotiated on a lump- sum basis, with
Bank		principal repayment on maturity and interest
		payable monthly. The credit line is NT\$60,000,000.
Subtotal	488,889	
Less: Due within	-	
one year		
Total	\$488,889	

The interest rate range of the long-term loans as of December 31, 2022 was 1.28% to 1.75%.

The secured loan is secured by a first mortgage on a portion of the land and buildings, please refer to Note 8 for deails.

14. Post-retirement Benefit Plan

Defined contribution plans

Expenses under the defined contribution plan for the years ended December 31, 2023 and 2022 were NT\$15,329,000 and NT\$15,004,000, respectively.

Defined benefit plans

The Company's and the domestic subsidiaries' employee retirement method adopts the defined benefit plan pursuant to the Labor Standards Act. Payment of employee pension is calculated on the base points of an employee's years of service and average monthly wages when the person is permitted to retire. Two base points will be assigned for 15 years (inclusive) of service or less, and for those exceeding 15 years

of service, every year will be assigned an additional base point. The maximum base points allowed is 45. The Company and the domestic subsidiaries provide a pension fund of 2% and 9% of the total salary on a monthly basis in accordance with the Labor Standards Act, and deposits it in a designated account at the Bank of Taiwan in the name of the Labor Retirement Reserve Supervisory Committee. In addition, the Company and the domestic subsidiaries estimate the balance of the aforementioned pension fund before the end of each year. If the balance is not sufficient to pay the aforementioned amount of pension benefits to eligible employees in the following year, the difference will be withdrawn by the end of March of the following year.

The Bureau of Labor Funds, Ministry of Labor, Executive Yuan, undertakes asset allocations based on the income and expenditure of the employee retirement fund. Investment of the fund is invested in self-operated and entrusted management methods, and adopts active and passive management medium- to long-term investment strategies. The Bureau of Labor Funds takes risks including market, credit, and liquidity into consideration in setting limits and control plan for the fund so that adequate flexibility can be used toward the compensation objective without excessive risk. The minimum annual income to be distributed from the fund shall not be less than the income calculated on the basis of two-year time deposits in local banks. If there is any deficiency, the National Treasury Administration shall make up the deficiency after approval by the competent authority. Since the Company does not have the authority to participate in the operation and management of the fund, it is not possible to disclose the fair value classification of plan assets in accordance with paragraph 142 of IAS 19. The Company's defined benefit plan is expected to contribute NT\$240,000 in the next year.

As of December 31, 2023 and 2022, the Company's defined benefit plans are expected to expire in 2033 and 2031, respectively.

The following table summarizes the cost of defined benefit plans recognized in profit or loss:

	2023	2022
Service costs for the current period	\$(162)	\$(397)
Net interest on net defined benefit liabilities (assets)	(132)	(116)
Total	\$(294)	\$(513)

Adjustments of the present value of the defined benefit obligations and fair value of the plan assets:

	2023.12.31	2022.12.31	2022.1.1
obligation	\$66,921	\$71,413	\$90,511
Fair value of plan assets	(52,649)	(61,240)	(71,124)
Other non-current liabilities net			
defined benefit liabilities recorded	\$14,272	\$10,173	\$19,387

Adjustments to the net defined benefit liabilities (assets):

	Present value of defined		Net defined benefit
	Benefit	Fair value of	liabilities
2022 1 1	obligation	plan assets	(assets)
2022.1.1	\$90,511	\$(71,124)	\$19,387 207
Service costs for the current period	397	-	397
Interest expenses (income) Subtotal	543	(427)	116
	91,451	(71,551)	19,900
Remeasurement of defined benefit liabilities/assets:			
Actuarial gains or losses from			
demographic assumptions	_	_	_
Actuarial gains or losses from		_	_
financial assumptions	(3,917)	_	(3,917)
Experience based adjustments	4,090	-	4,090
Return on planned assets	-	(6,336)	(6,336)
Subtotal	173	(6,336)	(6,163)

Employer allocations	-	(3,564)	(3,564)
2022.12.31	71,413	(61,240)	10,173
Service costs for the current period	162	-	162
Interest expenses (income)	928	(796)	132
Subtotal	72,503	(62,036)	10,467
Remeasurement of defined benefit			
liabilities/assets:			
Actuarial gains or losses from			
demographic assumptions	-	-	-
Actuarial gains or losses from			
financial assumptions	460	-	460
Experience based adjustments	4,369	-	4,369
Return on planned assets	-	(437)	(437)
Subtotal	4,829	(437)	4,392
Benefits paid	(10,411)	10,411	-
Employer allocations	-	(587)	(587)
2023.12.31	\$66,921	\$(52,649)	\$14,272

The following key assumptions are used to determine the Group's defined benefit plan:

	2023.12.31	2022.12.31
Discount rate	1.20%	1.30%
Expected rate of salary increase	1.00%	1.00%

	2023		202	22
	Increase in	Decrease in	Increase in	Decrease in
	defined	defined	defined	defined
	benefit	Benefit	benefit	Benefit
	obligation	obligation	obligation	obligation
Discount rate increase by 0.25%	\$-	\$1,139	\$-	\$1,321
Discount rate decrease by 0.25%	1,173	-	1,361	-
Expected salary increase by 0.25%	1,005	-	1,182	-
Expected salary decrease by 0.25%	-	981	-	1,154

Sensitivity analysis of every material actuarial assumption:

The purpose of conducting the aforementioned sensitivity analysis is to analyze the possible impact of determining a defined benefit obligation when a single actuarial assumption (e.g. discount rate or expected salary) undergoes a reasonably likely change, assuming all other assumptions remain unchanged. Since some of the actuarial assumptions are related to each other, there are few separate actuarial assumptions that undergo singular changes in reality, so the analysis has its limitations.

The methods and assumptions used in the current period of sensitivity analysis are no different from the previous periods.

15. Equity

(1) Common stock

As of December 31, 2023 and December 31, 2022, the authorized capital stock of the Company was NT\$ 2,000,000,000 and NT\$ 1,200,000,000 respectively; the share capital already issued by the Company reached NT\$ 866,740,000 and NT\$ 1,083,425,000 respectively with a face value per share of NT\$ 10. There were 86,674,000 shares and 108,343,000 shares respectively. Each share enjoys a voting right and the right to collect dividends.

The Company passed a resolution at the regular Shareholders' Meeting on June 20, 2023 to handle a capital decrease in cash and refund of share capital. This resolution was submitted for approval and became effective according to Letter Tai-Cheng-Shang-I-Tzu No. 1121803752 issued by Taiwan Stock Exchange Corporation on August 8, 2023. The decreased capital amount was NT\$ 216,685,000, and a total of 21,668,502 shares were canceled. The ratio of

Hunya Foods Co. Ltd. Notes to Parent Company Only Financial Statements (Continued)

(Amounts in thousands of New Taiwan Dollars, unless otherwise specified)

capital decrease reached 20%, and the base date of the capital decrease was August 9, 2023. Furthermore, the Company finished the handling of change registration on August 22, 2023. The base date of the capital decrease and issuance of new shares was October 6, 2023.

(2) Capital surplus

	2023.12.31	2022.12.31
Treasury share transactions	\$288	\$288
Consolidated surplus	33,108	33,108
Others	809	809
Total	\$34,205	\$34,205

The increase in capital surplus from treasury stock transactions was the result of the liquidation of the subsidiary, Hongshuo Corporation, which held disposal excess of the Group's shares.

The increase in capital surplus from the merger was due to the merger of Rivon, which became a company dissolved by the merger, and the total assets less the amount of debts assumed by the dissolved company and the amount paid to the dissolved company's shareholders.

As of December 31, 2023 and 2022, dividends that are not collected before the designated date amounted to NT\$809,000, respectively, and the Company adjusted capital surplus - other.

According to the law, the capital reserve shall not be used except to make up for the Company deficit. When the Company has no deficit, the overage of the shares issued by the par value and the capital reserve generated by the proceeds of the donation can be used to charge up the capital up to a certain percentage of the paid up capital each year. The aforesaid capital surplus may also be distributed in cash in proportion to the original share of the shareholders.

(3) Appropriation of net income and dividend policy

Pursuant to the Company's Articles of Incorporation, if a surplus is available after closing the accounts, it shall be first used to pay taxes, make up past deficits, then 10% of which shall be appropriated as legal capital reserve. The remaining amount shall be added to the accumulated undistributed earnings. The accumulated distributable earnings are determined after the special reserve has been appropriated or reversed in accordance with the law. The aforementioned

accumulated distributable earnings are determined based on the necessity of financing the capital requirements of the earnings, the amount of retained or distributed earnings and the method of distribution in accordance with the basic principles of the Company's dividend policy, and the proposal for distribution of earnings is submitted to the shareholders' meeting for resolution when new shares are issued. The distribution of dividends and bonuses or legal reserve and capital surplus, in whole or in part, shall be authorized by the Board of Directors with the presence of at least two-thirds of the directors and the approval of a majority of the directors present, and reported to the shareholders' meeting if the distribution is made in the form of cash.

The Company's dividend policy is based on the principle of continuous growth, maximization of operating profit and shareholders' equity, and stable business development. The annual dividend is based on the principle of paying no less than 50% of distributable earnings, with cash dividends accounting for at least 20% of the dividends paid.

Pursuant to the Company Act, legal capital reserve shall be appropriated until the total sum of which has reached the paid in capital. Legal capital reserve shall be used toward making up for the deficit. When the Company does not have past deficits, the Company may issue new shares or distribute cash with the portion of legal capital reserve that exceeds 25% of the paid in capital.

During the Company's Board of Directors' Meeting on February 27, 2024, and Annual Shareholders' Meeting on June 20, 2023, the appropriations and distribution of earnings for 2022 and 2021 have been separately proposed and approved with the following details:

_	Appropriati Distribution o		Dividends Per	Share (NT\$)
	2023	2022	2023	2022
Legal reserve	\$9,088	\$64,324		
Cash dividends of common stock (Note)	\$56,338	\$108,343	\$0.65	\$1

Note: The Company's Board of Directors has specifically approved the payment of cash dividends on common stock for 2023 and 2023 on February 27, 2024 and February 22, 2023.

Please see Note 6(19) for information on the standards of estimate and recognition of amounts of employee compensation and remunerations of the Directors and Supervisors.

16. Operating revenue

Analysis of revenue from contracts with customers during the years ended December 31, 2023 and 2022 are as follows:

(1) Disaggregation of revenue

2023

	Chocolate and

18. Operating lease

(1) Company as a lessee

The Company's various properties, including real estate such as land and buildings and transportation equipment. The lease terms range from 1 to 5 years, some of which are non-renewable, and there are no restrictions placed upon the Company by entering into these leases.

The Company's leases effect on the financial position, financial performance and cash flows are as follows:

- A. Amounts recognized in the balance sheet
 - (a) Right-of-use assets

Carrying amount of right-of-use assets

	2023.12.31	2022.12.31
Housing and Construction	\$36,765	\$30,491
Transportation equipment	313	242
Total	\$37,078	\$30,733

For the years ended December 31, 2022 and 2021, the Company's addition to right-of-use assets amounted to NT\$23,756,000 and NT\$10,165,000, respectively.

(b) Lease liabilities

	2023.12.31	2022.12.31
Lease liabilities	\$37,444	\$31,149
Current	\$15,781	\$14,354
Non-current	\$21,663	\$16,795

Please refer to Note 6(20)(3) Financing Costs for the Company's interest expense for lease liabilities in 2023 and 2022; and refer to Note 12(5) Liquidity Risk Management for the analysis on the expiration of lease liabilities as of December 31, 2023 and December 31, 2022.

B. Amounts recognized in the statement of comprehensive income

Depreciation charge for right-of-use assets

	2023	2022
Housing and Construction	\$17,083	\$17,436
Transportation equipment	328	1,497
Total	\$17,411	\$18,933

C. Revenues and expenses related to the lessee and lease activities

	2023	2022
Expenses relating to short-term leases	\$3,980	\$4,590
Expenses relating to leases of low-value	23	20
assets((not including the expenses relating		
to short-term leases of low-value assets)		

As of December 31, 2023 and December 31, 2022, the Company's committed short-term lease portfolio is similar in the category of the aforementioned lease related to short-term lease expenses.

For 2023 and 2022, the Company recorded a related rental reduction of NT\$0 thousand and NT\$51,000, respectively, in other income to reflect the change in lease payments resulting from the application of the relevant practical expedient method, which is in line with the direct result of the COVID-19 pandemic.

D. Cash outflow related to the lessee and lease activities

The total cash outflow related to lease of the Company in 2023 and 2022 was NT\$18,258,000 and NT\$19,074,000 respectively.

E. Other information relating to leasing activities

(a) Extension and termination options

Some of the Company's property rental agreement contain extension and termination options. In determining the lease terms, the non- cancellable period for which the Company has the right to use an underlying asset, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. These options are used to maximize operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable only by the Company. After the commencement date, the Company reassesses the lease term upon the occurrence of a significant event or a significant change in circumstances that is within the control of the lessee and affects whether the Company is reasonably certain to exercise an option not previously included in its determination of the lease term.

(2) Company as a lessor

Please refer to Note 6(8) for disclosures related to the Company's owned investment properties. Owned investment property is classified as an operating lease due to the non-transfer of substantially all the risks and rewards incidental to ownership of the subject asset.

	2023	2022
Lease revenue recognized from operating lease		
Income relating to variable lease payments that do not depend on an index or a rate	\$18,029	\$14,900

Please refer to Note 6(8) for relevant disclosure of property, plant and equipment for operating leases under IFRS 16.

For operating leases entered by the Company, the undiscounted lease payments to be received and a total of the amounts for the remaining years as of December 31, 2023 and 2022 are as follows:

	2023.12.31	2022.12.31
Not later than one year	\$17,092	\$13,357
Later than one year but not later than two years	14,218	8,678
Later than two year but not later than three years	12,803	8,174
Later than three year but not later than four years	8,552	8,174
Later than four year but not later than five years	4,728	4,616
Total	\$57,393	\$42,999

19. Employee benefits, depreciation and amortization expenses are summarized by function as follows:

By function		20	23			20	22	
By Nature	Operation Costs	Operation Expenses	Non- operation Expenses	Total	Operation Costs	Operation Expenses	Non- operation Expenses	Total
Employee benefits expense								
Salaries	\$215,703	\$141,483	\$-	\$357,186	\$201,727	\$158,505	\$-	\$360,232
Labor and health insurance	24,731	14,750	-	39,481	23,051	13,838	-	36,889
Pension	8,748	6,875	-	15,623	8,761	6,756	-	15,517
Remuneration Paid to Directors	-	553	_	553	-	7,883	-	7,883
Other Employee benefits expense	19 60	9,429	-	22,989	13,866	10,354	-	24,220
Depreciation expenses	82,402	48,936	1,745	133,083	80,242	54,367	1,749	136,358
Amortization expenses	24,410	15,214	-	39,624	25,446	14,175	-	39,621

- Note 1. As of December 31, 2023 and December 31, 2022, the Company had 714 and 717 employees and four of whom were Directors who do not concurrently hold positions as employees of the Company, respectively.
- Note 2. Average employee benefit expenses for 2023 and 2022 were NT\$510,000 and NT\$506,000 respectively. Average employee salary expenses for 2022 and 2021 were NT\$506,000 and NT\$500,000 respectively. Average employee salary adjustment increased 1.03%.
- Note 3. The Company has set up an audit committee to replace the supervisor in accordance with the regulations; the supervisor's remuneration for 2023 and 2022 was NT\$0,000.

Note 4. The Company's remuneration policy: The remuneration policy for directors, supervisors and managers of the Company is in accordance with the "Regulations Governing the Appointment and Exercise of Powers by the Remuneration Committee of a Company Whose Stock is Listed on the Taiwan Stock Exchange or the Taipei Exchange" and is submitted to the Remuneration Committee for consideration. The directors of the Company shall be compensated for their duties regardless of the Company's operating profit or loss, and their remuneration shall be determined by the Board of Directors' meeting with reference to the level of the industry; The compensation of the manager is highly correlated with the performance of the company's operation and the contribution of his duties, and is authorized to be determined by the board of directors' meeting; In addition to the basic salary, the Company pays bonuses according to the annual operation status to encourage morale and retain outstanding employees in a timely manner, and prepares salary adjustment items and amounts according to the grade and performance of employees with reference to the industry standard.

The Company's Articles of Incorporation provide that if there is profit in the year, 1-3% of profit shall be allocated for employee compensation, and no more than 2% shall be allocated for remunerations of the Directors and Supervisors. But when the accumulated loss is present, the Company shall first retain the profit to make up for deficits. The aforementioned employee compensation appropriated in shares or dividends shall be approved by a Board of Directors meeting attended by two-thirds or more of all Directors, and by a majority vote of all attending Directors, and reported to the Shareholders' Meeting. Please see the Market Observation Post System (MOPS) from the Taiwan Stock Exchange (TWSE) for information on employee compensation and remunerations of the Directors and Supervisors, as approved by the Board of Directors.

In 2023, the Company recognized employee compensation and directors' remuneration of NT\$1,105,000 and NT\$553,000, respectively, based on the current year's profitability at 3% and 1.5%, respectively, which were distributed based on the current year's profitability and included in salary expense. In 2022, the Company recognized employee compensation and directors' remuneration of NT\$14,565,000 and NT\$7,283,000, respectively, based on the current year's profitability at 3% and 1.5%, respectively, which were distributed based on the current year's profitability at 3% and 1.5%, respectively, which were distributed based on the current year's profitability at 3% and 1.5%, respectively, which were distributed based on the current year's profitability and included in salary expense.

20. Non-operating income and expenses

(1) Other income

	2023	2022
Rental income	\$18,029	\$14,900
Interest income	1,160	242
Other income-other	5,800	5,354
Other income $-$ Low-cost purchase benefits		8,520
Total	\$24,989	\$29,016

(2) Other gains and losses

_	2023	2022
Gains (losses) on disposal of property plant, and equipment	\$(1,367)	\$445,113
Gains on disposals of investments	2,710	-
Loss on scrapping of property, plant, and equipment	(397)	-
Net foreign exchange gains (losses)	1,898	(5,075)
Other expenses	(1,758)	(2,083)
Total	\$1,086	\$437,955

(3) Finance costs

	2023	2022
Interest on bank loans	\$9,030	\$7,040
Interest on lease liabilities	797	532
Imputed interest on deposits	51	24
Total finance costs	\$9,878	\$7,596

21. Components of other comprehensive income

The components of other comprehensive income for 2023 are as follows:

		Reclassificati on and adjustment in the current period	Other comprehens ive income	Income tax benefit (expense)	After-tax amount
Items that will not be reclassified to profit					
or loss:					
Remeasurement of defined benefit plans	\$(4,392)	\$-	\$(4,392)	\$878	\$(3,514)
Unrealized gains (losses) on	$\psi(1,3)\Sigma$	Ψ	Ψ[1,572]	<i>ψ</i> 070	Ψ(0,011)
investments in equity instruments at					
fair value through other					
comprehensive income	(204,422)	-	(204,422)	(4,950)	(209,372)
Share of other comprehensive income or loss of subsidiaries - associates					
and joint ventures recognized under					
the equity method - items not					
reclassified to profit or loss	(51)	-	(51)	-	(51)
Items that may be reclassified to profit or loss in subsequent periods:					
Exchange differences on translation of					
financial statements of foreign					
operations	928	-	928	-	928
Total	\$(207,937)	\$-	\$(207,937)	\$(4,072)	\$(212,009)

The components of other comprehensive income for 2022 are as follows:

	Arising in the current period	Reclassificati on and adjustment in the current period	Other comprehen sive income	Income tax benefit (expense)	After-tax amount
Items that will not be reclassified to profit					
or loss: Remeasurement of defined benefit plans	\$6,163	\$-	\$6,163	\$(1,233)	\$4,930
Unrealized gains (losses) on investments in equity instruments at fair value	Ф0,10 5	Φ-	Ф0,105	Φ [1,233]	\$4,930
through other comprehensive income	442,030	-	442,030	(13,578)	428,452
Share of other comprehensive income or loss of subsidiaries - associates and joint ventures recognized under the equity method - items not reclassified to profit

financial statements of foreign operations	(58)	-	(58)	11	(47)
Total	\$448,567	\$-	\$448,567	\$(14,800)	\$433,767

22. Income Tax

Major components of income tax expense (benefit) for 2023 and 2022 are as follows:

Income tax recognized in profit or loss

	2023	2022
Current income tax expense (benefit):		
Current income tax payable	\$18,847	\$-
Land value increment tax	-	37,135
Adjustments in respect of current income tax of		
prior periods	15	374
Deferred income tax expense (benefit):		
Deferred tax expense (benefit) relating to		
origination and reversal of temporary differences	633	2,163
Income tax (benefit) expense	\$19,495	\$39,672
Income tax recognized in other comprehensive income		
	2023	2022
Current income tax expense (benefit):		
Realized gains (losses) on investments in equity		
instruments at fair value through other		
comprehensive income	\$4,950	\$13,578
Deferred income tax expense (benefit):		
Exchange differences on translation of financial		
statements of foreign operations	-	(11)
Remeasurement of defined benefit plans	(878)	1,233
Income tax related to other components of other		
comprehensive income	\$4,072	\$14,800

Reconciliation between tax expense and the product of accounting profit multiplied by applicable tax rates is follows:

	2023	2022
Accounting profit before tax from continuing operations	\$35,185	\$463,828
Income tax calculated at the parent company's statutory income tax rate	\$7,037	\$92,765
Settlement of the Surtax on Undistributed Retained		
Earnings	18,847	-
Tax effects of non-deductible expense	(6,550)	(1,691)
Tax effects of revenues exempt from taxation	-	(87,853)
Tax effects of other - use of loss carryforwards		
adjusted in accordance with the law	146	(1,058)
Adjustments of current income tax in previous years	15	374
Land value increment tax		37,135
Income tax expense recognized in profit or loss	\$19,495	\$39,672

Deferred income tax asset (liabilities) balances related to the following items:

2023

	Beginning balance	Recognized in profit or loss	Recognized in other comprehens ive income	other	Ending balance
Temporary differences					
Book-tax difference in depreciation	\$1,804	\$(445)	\$-	\$-	\$1,359

assets/(liabilities)	\$17,482				\$14,097
Information stated on balance					
sheet is as follows:					
Deferred income tax assets	\$22,978				\$19,582
Deferred income tax liabilities	\$5,496				\$5,485

The following table contains information of the unused tax losses of the Company:

Year of occurrence	Loss amount	2023.12.31	2022.12.31	Expiration year
2017	\$88,248	\$44,458	\$44,458	2027
2018	9,077	9,077	9,077	2028
Total	\$97,325	\$53,535	\$53,535	

<u>Unrecognized deferred income tax assets</u>

As of December 31, 2023 and 2022, deferred tax assets that have not been recognized as they may not be used to offset taxable profits amounted to NT\$10,707,000 and NT\$10,707,000, respectively.

The assessment of income tax returns

As of December 31, 2023, the assessment of the income tax returns of the Company is as follows:

	The assessment of income	Remark
	tax returns	Kellidi K
The Company	Assessed and approved up to 2021	None

23. Earnings per share

Basic earnings per share is calculated by dividing net profit for the year attributable to ordinary equity owners of the parent entity by the weighted average number of ordinary shares outstanding during the year.

	2023	2022
Basic earnings per share		
Profit attributable to ordinary equity owners of the		
parent (in NT\$ thousand)	\$15,690	\$424,156
Weighted average number of ordinary shares		
outstanding for basic earnings per share(in		
thousands)	99,734	108,343
Basic earnings per share (NT\$)	\$0.16	\$3.91

There have been no other transactions involving ordinary shares or potential ordinary shares between the reporting date and the date the financial statements were authorized for issue.

VII. <u>Related Party Transactions</u>

Names and relationship of related parties

Related Party	Relationship with the Company
Rivon Trading (Shanghai) Co.,	The company is a sub-subsidiary of the Company
Ltd.	
Rivon Investment Co.	The Director of the company and the Chairman and
	President of the Company are the same person
Cheng Tien Investment Co.	The Chairperson of the company and the chairman of
	the Company are the same person
Croissant Bakery Ltd.	The company is a subsidiary of the Company

Material transaction matters with related parties

Accounts payable	707,222	488,889
Long-term loans (Due within one year)	4,361	3,539
Guarantee deposits received	37,444	31,149
Total	\$1,255,142	\$1,069,979

b. Objective and policy of financial risk management

The objective of the Company's financial risk management is to manage the market risk, credit risk, and liquidity risk related to operating activities. The Company conducts the identification, valuation, and management of the aforementioned risks based on the Company's policy and risk appetite.

The Company has set up appropriate policy, procedures, and internal control in regards to the aforementioned financial risk management based on relevant standards. Material financing activities need to be reviewed by the Board of Directors in regards to relevant standards and internal control system. During

implementations of financial management activities, the Company shall strictly abide by the regulations for financial risk management that have been set up.

c. Market risk

The Company's market risk is the risk of changes in fair value or cash flow from financial instruments due to market price changes. Market risk mostly includes exchange rate risk, interest rate risk, and other pricing risks (e.g. equity instruments).

In practice, very few risk variables are single occurring, and the change in each risk variable is usually correlated. Nevertheless, the sensitivity analysis on the following risks does not take the interactions between various risk variables into consideration.

<u>Foreign exchange risk</u>

The Company's foreign exchange rate risk relates primarily to foreign currency bank deposits.

The foreign currency sensitivity analysis of the possible change in foreign exchange rates on the Company's profit is performed on significant monetary items denominated in foreign currencies as of the end of the reporting period. The Company's foreign currency risk is mainly related to the volatility in the exchange rates for USD and EUR. The information of the sensitivity analysis is as follows:

When NTD appreciates or depreciates against USD by 1%, the profit for the years ended December 31, 2023 and 2022 decreases/increases by NT\$90,000 and NT\$375,000, respectively.

When NTD appreciates or depreciates against EUR by 1%, the profit for the years ended December 31, 2023 and 2022 decreases/increases by NT\$1,000 and NT\$254,000, respectively.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the bank borrowings with fixed interest rates and variable interest rates.

Sensitivity analysis for interest rate risk mostly targets interest rate exposure items after the reporting period and includes variable rate investments and variable rate borrowings. It adopts the assumption that in a given accounting period, when the interest increases or decreases by 0.1%, the Company's 2023 and 2022 income will increase by NT\$757,000 and decrease by NT\$534,000 respectively.

Equity price risk

The Company's listed and unlisted equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Company's listed and unlisted equity securities are included in the category measured at fair value through other comprehensive income. Portfolio information on equity securities is provided to the Company's senior management on a regular basis and the Board of Directors is required to review and approve all investment decisions on equity securities.

The Company does not hold listed equity securities that are mandatorily measured at fair value through profit or loss.

For investments in equity instruments measured at fair value through other comprehensive income, if the price of these equity securities increases/decreases by 1%, the equity in the Company's equity would increase/decrease by NT\$7,084,000 and NT\$9,999,000 in 2023 and 2022, respectively.

d. Credit risk management

Credit risk refers to the risk that the counterparty is unable to fulfill contractual obligations and leads to financial loss. The Company's credit risk mostly comes from operating activities (mostly from accounts receivable and notes receivable) and financing activities (mostly bank deposits and various financial instruments).

Each business unit of the Company follows credit risk policy, procedure, and controls in managing credit risks. The credit risk valuation of all trading counterparties comprehensively measures factors including the counterparties' financial status, credit rating, past transaction experiences, current economic environment, and the Company's internal valuations. The Company also adopts certain credit enhancement tools (e.g. prepayment) on a timely basis to reduce the credit risk from certain customers.

As of December 31, 2023 and 2022, receivables from top ten customers represented 76% and 84% of the total contract assets and trade receivables of the Company, respectively. The credit concentration risk of other contract assets and accounts receivables was insignificant.

The Company's financing department manages credit risk by managing bank deposits and other financial instruments in accordance with Company policy. The Company only transacts with counterparties approved by the internal control procedures, which are banks and financial institutions, companies and government entities with good credit rating. Consequently, there is no significant credit risk for these counterparties.

The Company has adopted IFRS 9 in the valuation of expected credit loss. Receivables are measured as allowances for lifetime expected credit losses.

Additionally, when evaluating financial assets that cannot be reasonably recovered, the Company will write off the assets (for instance, if the issuer or the debtor experiences material financial difficulty or has become bankrupt).

The Company's investments in debt instruments with increased credit risk are disposed of in a timely manner to reduce credit losses. When evaluating expected credit losses, forward-looking information (information that can be obtained without excessive costs or inputs) is also evaluated, including macroeconomic information and industry information, and the loss rate is further adjusted if the forward-looking information will have a significant impact.

e. Liquidity risk management

The Company maintains financial flexibility through contracts including cash and cash equivalents and bank loans, etc. The following table summarizes the maturity of the payments contained in the contracts of the Company's financial liabilities. It is compiled based on the date on which the earliest possible repayment is required using its undiscounted cash flow.

Non-derivative financial liabilities

	Less than 1		5 years or

g. Fair value of financial instruments

(1) Valuation technique and assumptions used in measuring fair value

> Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following methods and assumptions were used by the Company to measure or disclose the fair values of financial assets and financial liabilities:

- A. The carrying amount of the cash and cash equivalents, account receivables, account payables and other current liabilities is a reasonable approximation of the fair value, mainly because the period of maturity of such instruments is short.
- B. The fair value of financial assets and financial liabilities that are traded in active market and have standard terms and conditions are determined by reference to market quotations (e.g., listed stocks, beneficiary certificates, bonds and futures).
- C. The fair value of long-term borrowings is determined based on quoted prices from counter-parties, and assumptions such as interest rates and discount rates are made mainly with reference to information related to similar instruments (e.g., information on credit risk).
- (2) Fair value of financial instruments measured at amortized cost

The carrying amounts of financial instruments (including cash and cash equivalents, accounts receivable, accounts payable and other current liabilities) carried at amortized cost are a reasonable approximation of fair value.

(3) Information about the fair value hierarchy of financial instruments

For details of the fair value hierarchy of the Company's financial instruments, please refer to Note 12(8).

- h. Fair value hierarchy
 - (1) Definition of fair value hierarchy

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liabilities.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization at the end of each reporting period.

(2) Hierarchical information on fair value measurements

The Company has no non-recurring assets that are measured at fair value. The fair value hierarchy information of the recurring assets and liabilities is as follows:

December 31, 2023:				
	Level 1	Level 2	Level 3	Total
Assets measured at fair value: Measured at fair value through other comprehensive income Equity instruments measured at fair value through other				
comprehensive income	\$356,451	\$351,967	\$-	\$708,418
December 31, 2022:	Level 1	Level 2	Level 3	Total
Assets measured at fair value:				
Measured at fair value through other comprehensive income Equity instruments measured at fair value through other				
comprehensive income	\$514,633	\$485,226	\$14,860	\$1,014,719

Transfer between Level 1 and Level 2 during the period

During the year ended December 31, 2023 and 2022, there are no transfers between Level 1 and Level 2 of the fair value hierarchy for the Company's assets and liabilities that are measured at fair value on recurring basis.

Details of changes in Level 3 of the recurring fair value hierarchy

Reconciliation of the opening to closing balances of the Company's assets and liabilities measured at fair value on recurring basis within level 3 of the fair value hierarchy is as follows:

	Equity instruments measured at fair value through other comprehensive income
	Stock
2023.1.1	\$14,860
Amount influenced by exchange rate	208
Transfer-out from Level 3	(15,068)
2023.12.31	\$-
	Equity instruments measured at fair
	value through other
	comprehensive
	income
	Stock
2022.1.1	\$27,830
Total loss recognized in 2022:	φ27,030
Recognized in other comprehensive income	
(presented in "Unrealized gain (loss) on	
investment in equity instruments measured at	
fair value through other comprehensive income")	(12,970)
2022.12.31	\$14,860
	φ11,000

Information on significant unobservable inputs in Level 3 of the fair value <u>hierarchy</u>

The significant unobservable inputs to the Company's fair value hierarchy for assets measured at repeated fair values in Level 3 of the fair value hierarchy that are used for fair value measurement are presented in the following table: December 31, 2023:

The stocks of companies not listed in TPEx as originally purchased by the Group were listed on the Emerging Stock Market on August 8, 2023. Quotations of the same assets or liabilities on an active market could be acquired on the date of measurement, therefore Level 3 was transferred to Level 1.

December 31, 2022:

	Valuation techniques	Significant unobservable inputs	Quantitative information	Relationship between inputs and fair value	Sensitivity of the inputs to fair value
Financial assets : Financial assets at fair value through other comprehensive income					
Stock	Market approach and equity value of complex capital structures	Expected equity value volatility	91.23%~101.23% (96.23%)	The higher expected volatility of the equity value, the lower the fair value estimate	A 5% increase (decrease) in the expected percentage fluctuation of the equity value would decrease/increase the Company's equity by NT\$248,000.

(3) Information on hierarchy that is not measured at fair value but requires disclosure of fair value

December 31, 2023:

	Level 1	Level 2	Level 3	Total
Assets with disclosed fair value only:				
Investment property (Note 6)	\$-	\$-	\$741,484 ~1,249,811	\$741,484 ~1,249,811

December 31, 2022:

	Level 1	Level 2	Level 3	Total
Assets with disclosed fair value only:				
Investment property (Note 6)	\$-	\$-	\$632,125~ 971,142	\$632,125~ 971,142

i. Significant assets and liabilities denominated in foreign currencies

Information on the Company's foreign currency financial assets and liabilities with significant impact is as follows:

		Amount 1 2023.12.31	unit: thousand
	Foreign currency	Exchange rate	NT\$
Financial assets			
Monetary items:			
USD	\$294	30.71	\$9,029
EUR	\$2	33.98	\$68
		2022.12.31	
	Foreign	Exchange	
	currency	rate	NT\$
Financial assets			
Monetary items:			
USD	\$1,221	30.71	\$37,496
EUR	\$776	32.72	\$25,390

The above information is based on the carrying amount in foreign currency, which has been converted to functional currency.

j. Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust dividend payment to shareholders, return capital to shareholders or issue new shares.

XIII. Supplementary Disclosures

- 1. Information on Significant Transactions
 - (1) Financings provided to others: None.
 - (2) Endorsement/guarantee provided to others: None.
 - (3) Marketable securities held at the end of the period (excluding investments in subsidiaries, associates, and interests in joint ventures): Please refer to Attachment 1.

- (4) Individual securities acquired or disposed of with accumulated amount exceeding NT\$300 million or 20% of the paid-in capital: None.
- (5) Acquisition of property with the amount exceeding NT\$300 million or 20% of the paid-in capital: Please refer to Attachment 2.
- (6) Disposal of property with the amount exceeding NT\$300 million or 20% of the paid-in capital: Please refer to Attachment 3.
- (7) Purchases or sales of goods from or to related parties with the amount exceeding NT\$100 million or 20% of paid-in capital: None.
- (8) Receivables from related parties amounting to NT\$100 million or 20% of paidup capital: None.
- (9) Derivatives transactions: None.
- 2. Information on the reinvestment business: Please refer to Attachment 2.
- 3. Information on investment in Mainland China: Please refer to Attachment 3.
- 4. Information on major shareholders: Please refer to Attachment 4.

H
Note value uitougn outer comprehensive income
Financial assets at fair None value through other comprehensive income

Note 1: Securities mentioned in this table refer to stocks, bonds, and beneficiary certificates within the scope of IAS 39 "Financial Instruments: Recognition and Measurement" as well as valuable securities derived from the aforesaid items.

Note 2: If the issuers of securities are not interested parties, this column may not be filled out.

impairments in the column of carrying amount; for securities not measured at fair value, it is required to fill out the book balance obtained after deduction of accumulated impairments Note 3: For securities measured at fair value, it is required to fill out the book balance obtained after the evaluation and adjustment of fair value and the deduction of accumulated from the cost of initial acquisition or amortized cost in the column of carrying amount.

Note 4: If the securities listed are involved in provision of guarantee, pledge loan, or other restrictions for use as agreed, number of shares guaranteed or pledged, and guarantee or pledge amount, as well as the conditions of restricted use shall be specified in the remark column.

Note 5: Methods for filling out the fair value are as follows:

1. If there are open market prices, fair value refers to the average closing price in the last month of the accounting period. However, for an open-end fund, its market price refers to the net asset value of this fund on the balance sheet date.

2. If there are no open market prices, net worth per share shall be filled out for stocks, while other items may not be filled out.
